# The Fourth International Conference on Intelligent Systems in Production Engineering and Maintenance
## ISPEM 2023

## 13-15.09.2023
## Wrocław, Poland

# ABOUT

The Fourth International Conference on Intelligent Systems in Production Engineering and Maintenance ISPEM 2023 will be held in Wrocław (Poland) between the 13th – 15th September 2023. The upcoming conference will be organized byt hree universities from three countries, namely: Wrocław University of Science and Technology (Poland), Liverpool John Moores University (England), and the University of Minho (Portugal).

The conference's aim is to give an opportunity for researchers, experts, practitioners and other interested participants to exchange experiences in the intelligent systems, and tools applications in production, and maintenance. New solutions for innovative plants, research results and case studies considering advances in maintenance and production from the Industry 4.0 point of view will be presented and discussed. Special attention will be paid to the application of intelligent systems, methods and tools in production, maintenance, logistic, quality management, information systems, product development, ect.

# CAMPUS MAP

# VENUE

**Wroclaw University of Science and Technology Campus**

The meeting will take place at the WUST's campus:
H14 building
Address:
Wybrzeże Wyspiańskiego 40
Link to google maps: https://goo.gl/maps/w1Uv424a98f7pEKf8
